HOBBY LOBBY®

< CROWNING GLORY

To give this readymade baby's breath headpiece a little sparkle, trim the stems of rhinestone picks and scatter them throughout the florals. And for a statement-making bow, tie on satin and organza ribbons, and adhere astrantia blooms on top.

∨ FLORAL FAVORS

Mini bouquets of mixed stephanotis and eucalyptus were the finishing touches on these wedding favors. After filling the box with goodies, wrap it with trim and adhere the flowers on top.

Tip: Find the Thank You tags in Cards & Party.

WRIST BLISS

Creating your perfect corsage is easier than you might think! Begin by hot gluing florals (in this case, ranunculus picks and greenery) onto a circle of felt. Then adhere the arrangement to a piece of ribbon, and attach ribbon pinch crimps and magnetic clasps to each end.

TAKE THE CAKE

We customized readymade twig heart cake toppers with a beautiful collection of florals—from boho staples like pampas grass and palm spears, to simple silk flowers and greenery. And FYI, the DIY hoops are made from wood beads threaded onto craft wire.

ON THE COVER:

Embellish this readymade "Here Comes the Bride" basket by adhering reindeer moss and adding small floral arrangements on either side of the handle. Then fill the basket with eucalyptus leaves for the flower girl to toss!

LIGHT THE WAY

We transformed a bird cage card holder into a stunning garden lantern with an LED candle and a lush array of florals. Line the base with an adhesive moss mat, and then layer in the flowers, starting with larger blooms (like anemones) and finishing with smaller picks (like berry sprays).

GARDEN GREETING ^

Level up an off-the-shelf acrylic welcome sign by backing it with scrapbook paper, adding a frame, and adhering florals to the corners. For arrangements like these, start with peonies, ranunculus and eucalyptus leaves. Fill in any gaps with berries and pearl picks, and finish with curly twigs to create a trailing effect.

RING TRUE v

Florals are our go-to way to customize a picture-perfect ring pillow. To get the look, hot glue on sheer rosebud picks in the shape of a triangle, and then accent the blooms with touches of baby's breath and flocked greenery.
